Stampin' Dimensionals

[104430]

$4.00

Multipurpose Liquid Glue

[110755]

$4.00

Project Recipe:

1. Start with a Polished Pink cs card base. Cut a Polished Pink cs panel and glue it to the card base. Cut a Whimsy & Wonder Specialty DSP panel and stamp the sentiment from the Snowflake Wishes stamp set and the snowflakes from the Snowman Season stamp set in Polished Pink ink across the bottom left of the Specialty DSP panel. Then use paper snips to gently distressed the Specialty DSP panel's edges and glue to the card front.

2. Stamp the snowman from the Snowman Season stamp set in Polished Pink ink on Shimmery White cardstock. Use your Wink of Stella brush to add Polished Pink ink to color the snowman. Die cut out the image with the Layering Circles dies. Die cut Polished Pink cardstock and Polished Pink 2021-2023 Shimmer Vellum snowflakes with the Stitched Snowflake dies. Add the image circle to the card front overlapping the stamped sentiment/snowflakes with Stampin' Dimensionals. Be sure to place the Stampin' Dimensionals in the center of the image circle. Then use glue and glue dots to tuck the die cut snowflakes around the image circle.

3. Die cut a Shimmery White cardstock sentiment label with the Frightful Tags dies. Stamp the sentiment from the Peaceful Deer stamp set in Polished Pink ink. Add Polished Pink color to the label's edges with your Wink of Stella brush. Use glue dots and Stampin' Dimensionals to add the sentiment label to the card front across the bottom of the image circle and Specialty DSP panel.

4. Tie a small bow with White Baker's Twine and use glue dots to add it to the left corner of the sentiment label and overlapping the image circle. Add Opal Rounds to the card front around the image circle.

5. Don't forget to add a Shimmery White cardstock inside panel to write your message. I stamped the sentiment and snowflakes from the Snowflake Wishes stamp set in Polished Pink ink. Stamp the snowflakes from the Snowman Season in 1st & 2nd Polished Pink ink. I also added a strip of Specialty DSP to the inside and back of the card to pull the theme through.
